Spatial scenarios in relation to the ESDP and EU Cohesion Policy

ESPON Project 3.2

Thematic scope and context

The main objective of the project is to develop spatial scenarios which should on the one hand be prospective, capable of prognostics with reference to a laissez-faire scenario on themes of the ESPON and policy orientations of the ESDP.

On the other hand the scenarios should as well be proactive testing alternative objectives and provide insight for recommendations on policy adjustments/changes in EU policies that would favour a balanced and polycentric territory and territorial cohesion within an enlarged European Union. The time horizon for the spatial scenarios is set to 2015 (mid term) and 2030 (long term).

Lead Partner

[Free University of Brussels - IGEAT](#) (Belgium).
